Projects

1. Neways SHCash:

Super Hostel Referral App is designed for hostel residents to earn rewards by referring new members. Easily invite friends, track your earnings, manage bookings, and withdraw commissions—all in one place. Our secure and transparent system ensures a smooth referral process with real-time statistics. Join now and start earning from your referrals!

Key Features:

- Multi-member referral system
- Real-time income statistics
- Easy withdrawal process
- Booked list tracking
- Secure and transparent transactions

2. Provider Hub

Provider Hub is a cutting-edge mobile application designed to facilitate access to mental health and developmental disability providers for individuals seeking support. Aim to empower users by connecting them with the resources, professionals, and community they need to thrive. With a focus on accessibility, personalization, and comprehensive care, Provider Hub aims to enhance the overall well-being of its users.

Key Features:

- **User-Centric Profiles:**
 - Create a personalized profile to share your needs, preferences, and goals. This helps the app recommend tailored resources and providers, ensuring a customized experience.
- **Provider Search and Match:**
 - Utilize our advanced search functionality to find qualified mental health and developmental disability providers based on specialty, and location.
- **Chatting:**
 - Here have a chatting system. Users can chat with providers anytime. This chatting system managed with firebase.
- **Payment Method:**

- This app is subscription-based and paid app. Here use the In_app_purchase payment method. Here have a package system. After clear payment will get a chatting feature, and provider profile information. Here first used a stripe payment method and then used In_app_purchase.

3. Neways Attendance System [↗](#)

Face Attendance - Secure Check-In

Mark your attendance effortlessly using facial recognition technology. Our secure system verifies your identity while protecting your privacy.

Key Features:

- Facial recognition attendance
- Works only on authorized company WiFi
- Real-time verification with ERP system
- No biometric data stored in app
- Simple one-tap process

4. Bdjobs Employer [↗](#)

I am working on the Bdjobs Employer application. This application is based on the job recruitment process. This application can sort qualified job seekers. I have experience working with Bloc state management, GetX state management, Dependencies Injection, Dio, Video player, Freezed (Code generator), Firebase messaging, Push notification, Local notification and so on.

5. Score Live Score

I have done multiple sports applications. Live streaming was available in the application. Can do live chat for premium users. As a state management, they used GetX state management. Worked on Google sign-in, One signal package for IOS push notification, In-app purchase, Firebase auth, Unique Identifier, Device Info, and so on.
