MD. MEHEDI HASAN

FLUTTER APPLICATION DEVELOPER

mdmehedihasan4051@gmail.com | +880 1877-286284 | Dhaka, Bangladesh | **Portfolio** | **LinkedIn** | **LeetCode**

PROFESSIONAL SUMMARY

Results-driven Flutter Application Developer with over 4.5 years of experience architecting and delivering cross-platform mobile solutions for enterprise and consumer products. Proficient in Clean Architecture, GetX, Bloc, and Firebase, with a strong track record of translating complex business requirements into scalable, maintainable applications. Adept at building multi-stage approval workflows, real-time communication systems, and secure ERP platforms that streamline operations and reduce turnaround time. Recognized for strong ownership, cross-functional collaboration, and a commitment to writing clean, production-grade code from initial design through deployment.

PROFESSIONAL EXPERIENCE

Software Engineer, Flutter (Mobile Application Development) Jun 2025 – Present

Nexdecade Technology Pvt. Ltd. • *Dhaka, Bangladesh*

- Built a multi-role Flutter ERP app (BTV ERP) for Bangladesh Television spanning Gate Pass management, Artist Enlistment, Budget Approval, and File Management, using Clean Architecture, GetX, and Firebase.
- Implemented Pre/Post-Budget management with rate cards, travel allowances, and live totals; multi-stage approval workflow (Submit → PM → GM) cut approval turnaround from 3–5 days to 1–2 days.
- Developed a Vehicle Tracking System (VTS) mobile app integrating Google Maps for real-time fleet tracking.
- Engineered a surveillance application with live video streaming via WebRTC.
- Built a WhatsApp-style social application supporting real-time chat and audio/video calling using WebSocket and WebRTC.
- Applied GetX, Bloc, and Provider state management across projects to maintain scalable, testable codebases.
- Implemented data encryption/decryption to secure sensitive application data.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications with deep-link routing.
- Bridged mobile applications with backend services through RESTful API integration.

Flutter Developer Mar 2024 – Jun 2025

Neways International Company • *Shahbag, Dhaka, Bangladesh*

- Developed cross-platform iOS and Android ERP modules for employee attendance, task management, leave requests, and salary advance requests, with real-time chat via WebSocket.
- Built a facial recognition attendance system with real-time verification against the ERP backend.
- Consumed and integrated RESTful APIs built with Laravel to connect mobile apps with backend services.
- Implemented push notifications using Firebase and Pusher.
- Applied GetX, Bloc, Provider, and Riverpod state management across features; delivered fully responsive UI.

Jr. Mobile Application Developer Oct 2022 – Jan 2024

BDJOBS.COM • *Dhaka, Bangladesh*

- Led development of the employer application's job-seeker selection flow, including video resume showcasing, streamlining the hiring journey for recruiters.
- Implemented GetX, Bloc, and Riverpod state management and delivered responsive UI across devices.
- Integrated RESTful APIs to connect the Android application with backend services.

Flutter Application Developer Mar 2022 – Sep 2022

Root Devs • *Dhaka, Bangladesh*

- Built sports applications with live match streaming and real-time score updates.
- Integrated third-party packages for push notifications, in-app purchases, Google Sign-In, and media playback (Better Player).
- Implemented GetX state management and translated Figma designs into fully responsive UI.

Jr. Mobile Application Developer Nov 2021 – Feb 2022

Skoder Technologies • *Dhaka, Bangladesh*

- Built two healthcare applications — Mediaid Pro (patient) and Mediaid (doctor) — including a core video-calling feature between doctors and patients.
- Integrated RESTful APIs and delivered responsive UI from custom Figma designs.

Mobile Application Development Intern Jun 2021 – Oct 2021

Skoder Technologies • *Dhaka, Bangladesh*

- Designed responsive mobile application UI in Figma and translated designs into functional layouts.

CORE SKILLS

CORE FLUTTER Custom Widgets, Clean Architecture, MVVM, Responsive UI Design, Dio, GetIt	**STATE MANAGEMENT** GetX, Bloc, Provider, Riverpod
LANGUAGES Dart, Python, C, C++	**ARCHITECTURE** Clean Architecture, MVVM, Dependency Injection (GetIt)
NETWORKING Dio, RESTful APIs, WebSocket, WebRTC	**BACKEND & CLOUD** Firebase (FCM, Auth, Crashlytics, Realtime Database), Laravel APIs
TOOLS & UTILITIES Google Maps SDK, QR Code Scanning, Data Encryption, In-App Purchases, Push Notifications	**VERSION CONTROL & DESIGN** Git, GitHub, Figma

KEY PROJECTS

BTV ERP Mobile App

Cross-platform Flutter ERP application for Bangladesh Television's internal operations.

- Gate Pass System — role-based visitor/artist entry passes with real-time approval tracking and QR-based scanning for instant verification.
- Artist Enlistment & Grade Enhancement — end-to-end grade upgrade workflow with document uploads, status tracking, and admin-managed profiles/categories.
- Bill & Voucher Tracking — digital payment history and tax certificate downloads for artists, with admin-side settlement monitoring.
- File Management — secure FTP-style module for uploading, sharing, and permission-controlled access to production files (PDF/DOCX/media).
- Program Scheduling — unified calendar linking programs, artists, and shoot dates for production planning.
- Role-based dashboards (Admin/Artist/Visitor) with real-time FCM notifications and English/Bangla language support.

Tech Stack: *Flutter, Dart, GetX, GetIt, Dio, Firebase (FCM, Auth, Crashlytics), Google OAuth, TUS Upload, Syncfusion PDF, Clean Architecture*

Bdjobs Employer

Job recruitment platform for employers to source and shortlist qualified job seekers.

- Built core recruitment workflow features enabling employers to filter and sort qualified job-seeker candidates.
- Implemented Bloc and GetX state management with dependency injection for a scalable, maintainable codebase.
- Integrated Dio for networking, Freezed for code generation, and an in-app video player for candidate video resumes.
- Implemented Firebase Cloud Messaging along with push and local notifications for real-time recruiter updates.

Neways Attendance System — Face Attendance

- Built a secure facial recognition check-in system restricted to authorized company WiFi, with real-time ERP verification and no on-device biometric storage.

Sccore — Live Sports Score App

- Developed live-streaming sports applications with in-app premium chat, Google Sign-In, in-app purchases, and Firebase Auth.

EDUCATION

B.Sc. in Engineering Mar 2016 – Mar 2020

Bangladesh Army University of Engineering and Technology, Natore, Bangladesh

Higher Secondary Certificate Jan 2012 – Jan 2014

Bogura Cantonment Public School and College, Bogura, Bangladesh

Secondary School Certificate Jan 2009 – Jan 2011

Bogura Cantonment Public School and College, Bogura, Bangladesh

CERTIFICATIONS

- Flutter Application Development — Udemy (Jul 2021)
- Basic Flutter Application Development — Amar Bangladesh Foundation (Oct 2020)
